NAPHTHA STREET LIGHTING

Strong Rivalry Between Four Bidders for District Work.

Globe Company Makesan Offer, Which the Commissioners Quickly Seized. Tests of Lights.

The Pennsylvania Globe Company, one of the four ladders for the contract for maphtha street lighting in the District, was before the Commissioners today to show that while the Lid submitted by him was not the lowest, he was nevertheless the only contractor who had complied with the requirements, and the only one who could properly execute the contract, if awarded, upon the proposals submitted. His bid was at the rate prevailing last

year-820 per lamp. The lowest bid was that tendered by Juseph C. Chung, \$16.50 per lamp. The other two were from the Potomae 1 gat and Power Company and the Washington Gas Light Company. Mr. Maioney stated it was an absolute

impossibility for either of his competitors to faiffil the contract. The gas company would not have entered the lists, he said, had it not desired to get the Globe Company

out of its way.
"I don't know why the electric company
made its bid," he added, "but I suppose
you gentlemen know. I am informed, however, that it is a more makeshift with that company, to give it time to get its electric plant in operation.

without a written request, and their names were entered in a little book, but the boys and girls who bustled to the front were required to show the written consent of parents or guardians. Those who had failed to thus provide themselves were turned away, only to return suitably equipped. Some of the requests were suspicious alike as to chirography, and many were on paper of the same quality, color and finish, but all were passed. There was no time for debate—scarcely time to say "allright-sendbymani"—and if investigation be necesany it will be made later.

The superintendent's mail this morning brought a bulky budget of requests for

On the train between Alexandria and this city he met two white men. They were strangers, but very pleasant folks.
One of them told Edwards that he wanted a man servant, and agreed to pay \$40 a month. Edwards accepted the position. When they reached Washington they took n some of the places of interest.

One of the men met a friend, who stated that he was going to the express office for a package. They were short of small hills, though one of them had a check for

It was too late to cash it. They borrowed \$7.50 from Edwards, all the money be had, and dispatched him to the railroad station to keep his eye on a satchel which they said contained \$2,500 in gold. They would be with him in a minute and then they would go on to Baltimore.
Edwards went to the station. He waited four hours. The men did not return. It was the old, old story.

Hart, O'Brien, Murphy and Nunez of the Bermuda, Held on Bail, New York, July 2 .- The jury which deiberated until a late hour last night over the evidence presented in the trial of John D. Hart, Emilio Nunez, Capt. John O'Brien, and Mate Edward Murphy, accused of having aided and abetted a military expedition to Cuba, came into the United States circuit court this morning and told Judge Brown

that they could not agree.

His honor discharged the jury and then listened to a long argument about the bail bonds of the defendants.

United States District Attorney McFarlane said that they would probably be tried again if the witnesses could be again got together, and he wanted the defend-ants held under ball to appear at the Octo-

ber term of court.

An effort to secure a reduction of ball was made by counsel for the defense, but excepting the case of Mate Murphy, Judge Brown, directed that the ball remain \$2,500 in each case. Murphy's ball was reduced to \$500. The eleven men who have

been detained as witnesses in Ludlow Street Jail were ordered discharged. Among prominent Cubaus in court during the proceedings were Gonzalo de Quesada, Cuban charge d'affaires at Washington; B. J. Guerra, treasurer of the Cuban lega-tion in this city; J. A. Gutterrez, treasurer of the Cuban fair; S. Arteaga and A.

EDISON'S DEBT TO HIS WIFE. Their Life Refutes the Saying That a Genius Shouldn't Marry. New York Press. Thomas A. Edison has been married twice. To his two wives he owes con-

siderable of his success as the greatest lig-ing inventor and the greatest inventor that ever lived. They looked after his health and physical welfare, and long him to re-tain that vigor without which he could not stand the strain of day after day in his laboratory, without a wink of sleep.
Twenty-two years ago Edison's friends
urged him to marry, hoping that domestic
life would compet him to eat at least one meal a day and sheep with some regard to regularity. Edison said he had no time to coart, but it some decent girl wanted to marry him he had no objections. One day, while watching a young woman who was working one of his instruments and to whom he never before had spoken, heasked her, somewhat anxiously, if she would be his wife. She said yes, and in three days they were married, though he came near forgetting the hour for the ceremony, be-

ing busy on a complex machine.

Waiter P. Phillips has been quoted as water P. Primaps has been quoted as telling this story of Edison: One night a friend of the inventor found him in his Newark laboratory, and went in, saying: "Aren't you going home, Tom; it's late." "How late?" said Edison, yawning.

"About 1 o'clock," returned his triend.
"Is that so?" exclaimed Edison. "By "Is that so?" exclaimed Edison. "By George, I must go home. I was married this morning."

By his first marriage Edison had three children—Thomas, William, and Marion. The last two were nicknamed by their father

Dot and Dash, and Dot has clung to Marion

even in her days of early womanhood. She is well educated and has spent some time in Europe.

The second Mrs. Edison was Miss Mina
Miller, daughter of Lewis Miller, of Akron,
Ohio. Lewis Miller besides being the
founder and early financial backer of the Charianque Assembly, is a richmanufactur; and an inventor of some note. To his daughter Edison was married in February, 1886. They have had two children, Madeline and Charles. When Edison spends whole days at a time in his laboratory, Mrs. Edison goes to bim, sleeping on a cot near his workbench. She is a good pianist and is well read. She is young and fine looking, has dark eyes and hair, and is of

a vivacious disposition. CHRISTIANS AND THE TURK. Moslem Persecutions Explained in a Decidedly Cynical Way.

Saturday Review.

The Turk has made such a criminal fool of himself in Armenia that all Christendom is prepared to take sides against him and to sympathize warmly with anybody who sheds his blood. The apparent fact that in Crete thus far ten Turks have been been been former Carrett Christian Turks have been siam for every Christian "massacred" makes no difference with outside sentiment. We are all in the mood to have Turks killed.

But it will do no harm, all the same, to understand the situation as it exists. The various Christian populations who are in one way or another subject to the Turk are infinitely shrewder than he is, are in one way or another subject to the Tork are infinitely shrewder than he is, and they have acquired by experience and observation a very accurate knowledge of what may be described as his mental and moral mechanism. They know how to wind him up, so to speak, and how to set him going in my fesired direction. They can keep him uigt and even amiable, and make money of of his lethargic incapacity for affairs, so long as it suits their book to do so. When their interests point in the other direction they are masters of the trick of dringing him out into the street forthwith, sword in hand, with a mad beast's just for alsogher and outrage. It amounts to Tries in the Ottoman empire that whenever Christians are being raided and butchered by the Osmanli Turk it is because some group of "Christian" agitators has deemed the moment opportune for giving the world a fresh object

considerable long stock was thrown oves board. An uneasy feeling prevailed, and the bears were laying great stress on the evils to follow the adoption of a free silver platform by the Chicago convention. Rumors of heavy exports of gold late in the week were revived, but could not be con-firmed. Some of the leading foreign houses stated that they would not ship sold at all. and in fact were making preparations to forward securities. At 11 0'clock the mar-ket was nervous and weak. Stocks were firmer after 11 0'clock, the

London bought twelve to fifteen thousand pressure from bear sources having abated shares of the leading issues, and this had a great deal to do with the raily of I-5 to 23-8 per cent which occurred during the second hour.

agitators has deemed the moment oppor-tune for giving the world a fresh object lesson in Turkish brotality.

Doubtless there is much to be said in defense of this employment of artifles against brute strength. Each time that the experiment succeeds in provoking a
